

Design system.

01

Build it like Luna.

One typeface family, one accent color, one quiet neutral scale, and a small set of shapes that repeat everywhere. Everything you need to ship a Luna-branded website, marketing page, or UI surface without asking design. **Photography, iconography, and product-specific patterns are covered separately** - this is tokens, type, colors, and components only.

CLIENT	SCOPE	FORMAT	SUPERSEDES
Luna Health, Inc.	Foundations + UI kit	Letter portrait · 8 pp	Brand essentials v1.0

07	Buttons + inputs	p. 7	08	Badges + cards	p. 8

Typography.

02

Two families: **D-DIN** for display, wordmark, and large numbers; **Inter** for everything else (body, UI, buttons, labels). D-DIN ships as one weight - use size and tracking, never "bold D-DIN". On Apple devices Inter is substituted automatically for SF Pro.

D-DIN

DISPLAY · REGULAR 400 · BRAND FONT

luna - By the light of the
moon.

ABCDEFGHIJKLMNOPQRSTUVWXYZ · abcdefghijklmnopqrstuvwxyz · 0123456789 · . , ; ! ? & @ \$ % # + - * / ()

Primary colors.

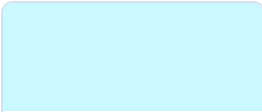

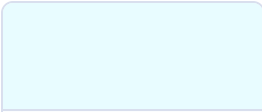

03

Three colors do 90% of the work: **Midnight** for depth, **Moonlight** for accent, **White** for space. This trio sets the mood of every Luna surface. If you only remember one rule: **Midnight carries Moonlight** - the accent almost always sits on or near navy.

 PMS 282 C	 PMS 3105 C	 PAPER BASE
Midnight Primary brand. Dark surfaces, headlines on white, the wordmark. HEX · #041E42 RGB · 4 / 30 / 66 CMYK · 100 / 90 / 30 / 30	Moonlight Accent. Rules, links, focus states, primary CTA on dark. HEX · #68D2DF RGB · 104 / 210 / 223 CMYK · 55 / 0 / 15 / 0	White Page background, breathing room, cards on light surfaces. HEX · #FFFFFF RGB · 255 / 255 / 255 CMYK · 0 / 0 / 0 / 0

MOONLIGHT TINTS

ACCENT FAMILY · USE SPARINGLY

 Midnight Deep Gradient low on dark heroes. #031632	 Midnight Soft Softer navy for splash. #0F1C40	 Moonlight Deep Moonlight gradient endpoint. #0A9AAE	 Moonlight Ice Soft icy tint. #C9F8FE	 Moonlight Tint Palest wash / halo. #E8FCFF
--	---	---	---	--

DO

Lead with Midnight on dark hero sections; pair with Moonlight as a single accent (rule, link, CTA). Use **60%+ white space** on marketing pages. Gradient: #133465 -> #031632 top-to-bottom for atmospheric heroes.

DON'T

Don't tint the wordmark. Don't introduce new accents. Don't flood large areas with Moonlight - it's an accent, not a field. Don't put Moonlight text on white below 14px (contrast fails WCAG AA).

Secondary & neutrals.

04

The quiet supporting cast - UI chrome, hairlines, disabled states, chart axes, secondary text. Never a brand color, never a hero field. If a surface reads busy, remove a secondary before adding one.

BORDERS & LINES

HAIRLINES, INPUTS, FOCUS

TOKEN	VALUE	USE
Border subtle	#EDF0F7	Hairline between rows / cards on light.
Border default	#D1D1D1	Input underline, dividers.
Border strong	#ACC1DF	Emphasized dividers, table heads.
Border focus	#68D2DF	Focus ring, active input underline.

Alerts & accents.

05

Status colors. Each one means exactly one thing. On marketing you'll mostly use **Success** (form confirmations) and **Critical** (errors). Warning and Info are product-facing. Show **one alert at a time** - stacking alerts reads as a broken state.

EMERALD	MOONLIGHT	AMBER	PLUM
Success Confirmations, completed, in-range. Ink · #2E7D32 Fill · #B0F9B3 Bg soft · #E7F8E8	Info Notes, tips, neutral status. Ink · #0A9AAE Fill · #C9F8FE Bg soft · #E8FCFF	Warning Attention needed, not urgent. Ink · #6B4B10 Fill · #F9CD85 Bg soft · #FFF3DC	Critical Errors, out-of-range, stop. Ink · #8E3655 Fill · #E0A4B8 Bg soft · #F7E4EA

APPLIED

INLINE ALERT / BANNER

SUCCESS You're on the early-access list. We'll email you when a device is ready.	
INFO Luna is FDA-pending. Shipping to limited pilot sites only.	
WARNING Your reservoir runs out in about 2 hours.	
CRITICAL That email isn't valid - please check and try again.	
RULES OF THUMB Status color is the strongest signal on a screen - everything else yields. Pair the fill with its paired ink (never fill+random-ink). Include a label word ("Error") alongside the color so colorblind users aren't left guessing.	DON'T Don't use alert colors decoratively - they belong to status. Don't stack more than one alert. Don't use red - Critical is plum (#8E3655) to read as serious without feeling alarming. Don't promote an error to a popup unless it blocks the user.

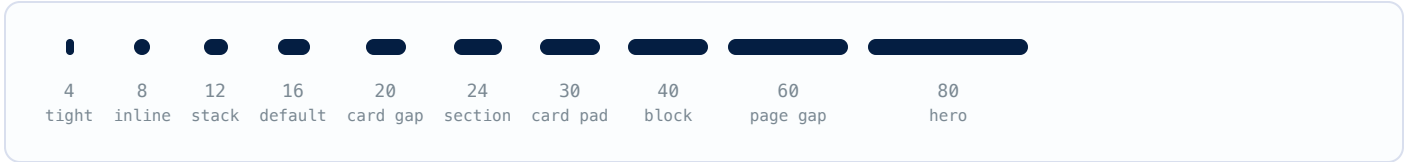

Space, shape, depth.

06

The rhythm of the system. All spacing is **8pt-based** (with a 4pt half-step for tight places). Radii are shape, not decoration - a pill button means "action", a 16px card means "container". Shadows are restrained: **never layered**, always purposeful.

SPACING · 8PT SCALE

PX VALUES

RADII

CORNER SHAPE

SHADOWS

ELEVATION

SPACING RULE OF THUMB

16 is default. **8** when things are related. **24+** when they're separate. **40+** between sections. Consistency beats cleverness - if in doubt, pick 16.

SHAPE LANGUAGE

Round corners say "approachable" - match radius to scale: small elements get small radii, cards get 16, heroes get 24. **Pills are for actions only**; use 8px radius for inputs, never pill.

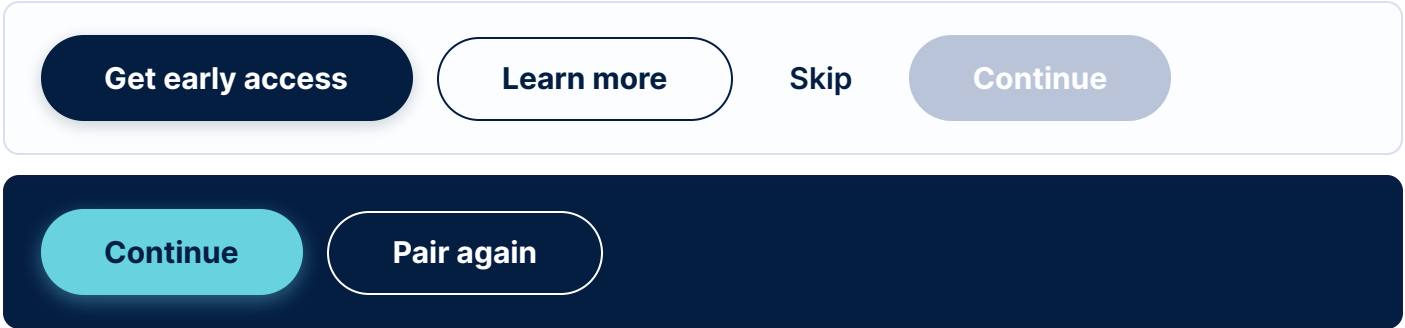

Buttons & inputs.

07

Three button styles, one input style. That's it. **Primary** for the one most important action on a screen, **Secondary** for the alternative, **Ghost** for tertiary. Inputs are underline-only on marketing, filled on in-product forms.

BUTTONS

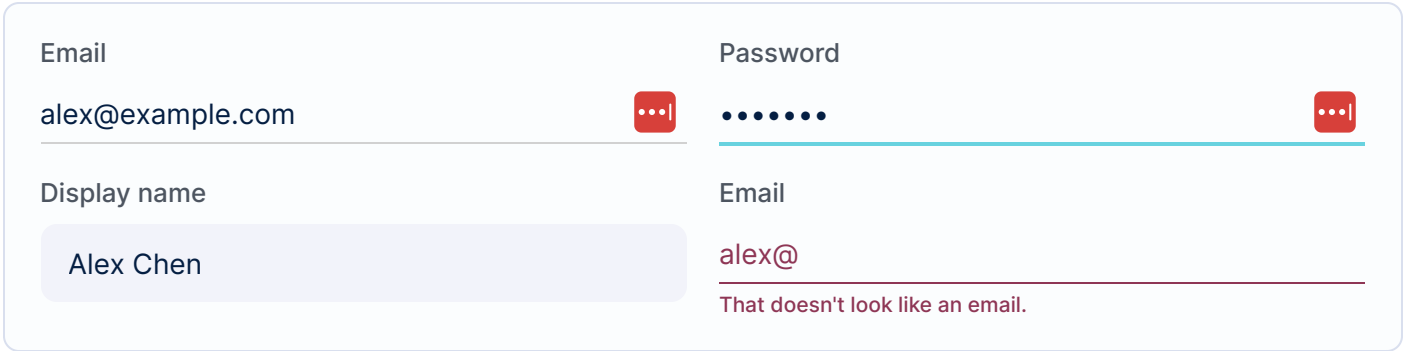

PILL · 58PX RADIUS

PROPERTY	PRIMARY (DARK BG)	PRIMARY (LIGHT BG)	SECONDARY	GHOST
Fill	#68D2DF	#041E42	transparent	transparent
Text	#041E42	#FFFFFF	ink (current)	ink (current)
Border	none	none	1.5px #041E42	none
Radius	58px (pill)	58px	58px	0
Padding	15px 40px	15px 40px	13.5px 40px	15px 16px
Label	Inter 18/700	Inter 18/700	Inter 18/700	Inter 16/500
Shadow	0 3 10 moonlight/40%	0 2 8 ink/20%	none	none
Disabled	fill #BAC4D9, text #FFFFFF, no shadow. Cursor not-allowed.			
Hover (web)	+4% lift (translateY -1px), shadow scales 0 → 6 20 moonlight/50%. 160ms ease-out.			
Focus ring	outline: 2px solid #68D2DF; outline-offset: 3px; (same for all variants)			
Min target	44px height mobile / 40px web. Never smaller.			

INPUTS

UNDERLINE (MARKETING) · FILLED (IN-PRODUCT)

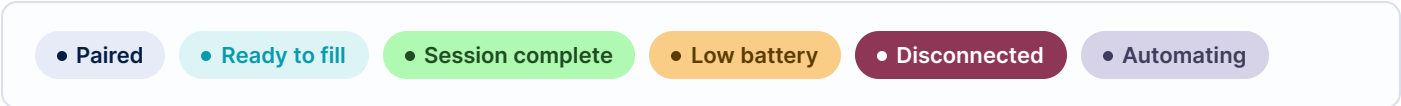

PROPERTY	UNDERLINE	FILLED
Fill	transparent	#F2F3FA
Border	bottom 1px #D1D1D1	none

Badges & cards.

Badges classify state or category - always a word, always a dot. **Cards** are the default container for anything grouped. One radius (16px), one shadow (card), generous padding. A card with too much in it should become two cards, not a denser one.

BADGES

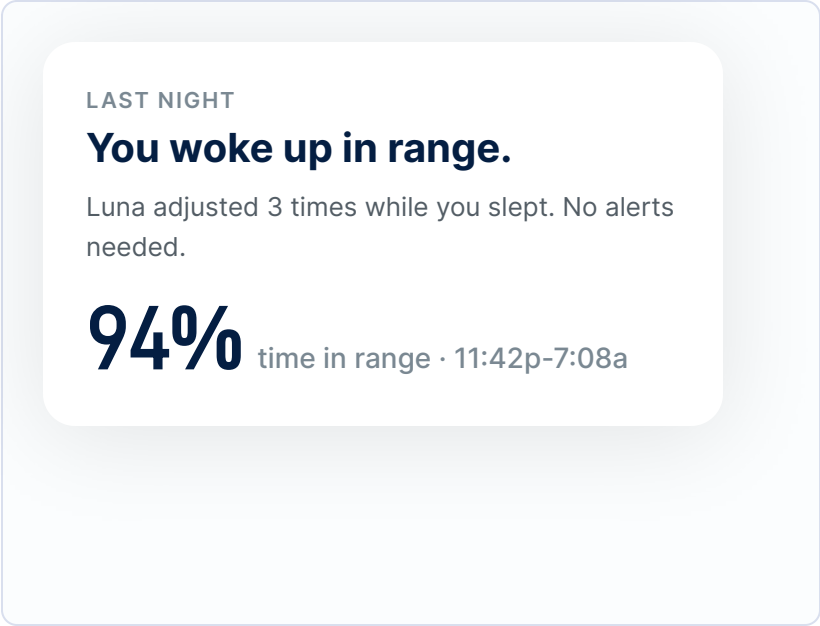

STATUS · 999PX PILL · 6PX DOT

PROPERTY	VALUE
Height	22px (padding 6px 12px)
Radius	999px (full pill)
Label	Inter 12/600, sentence case, 1 or 2 words
Dot	6px circle, currentColor, 6px gap from label
Fills	Use soft alert fills (Success / Warning / Critical) for status; Periwinkle Mist for neutral / factual tags; Lunar Lavender for categorical.
Text color	Always the alert's dark ink, not black. On Critical solid (#8E3655) use white.

CARDS

16PX RADIUS · CARD SHADOW · 22PX PAD

PROPERTY	VALUE
Fill	#FFFFFF (on light)
Radius	16px
Shadow	0 5 50 rgba(0,0,0,.10)
Padding	22px (24px web desktop)
Gap between	16px (stacked) / 20px (grid)
Eyebrow	Inter 11/600 uppercase Slate, 0.08em
Title	Inter 20/700 Ink
Body	Inter 13/400 Graphite, 1.5 leading
Large stat	D-DIN 44/700 Ink, -0.02em tracking
Max width	340px single col / grid flex

DO

One idea per card. One action per card. Use the eyebrow to say *what kind* of thing this is ("Last night", "Upcoming"). Let cards breathe - whitespace inside a card is more important than a border around it.

DON'T

Don't nest cards inside cards. Don't add a border *and* a shadow. Don't crowd the top-right with badges + menus + timestamps - pick one. Don't use card shadow on dark (navy) surfaces; use a 1px #0f1c40 hairline instead.
